

# System Explanation

With the complete 12 Volt system from Garden Lights you are assured of a light plan that can be installed safely, quickly and without an installer by everyone. By connecting the lamps simply on the cable through the connector, the system is easy to install for everyone. Plug & Play!

**1**

**Lighting choice**

**2**

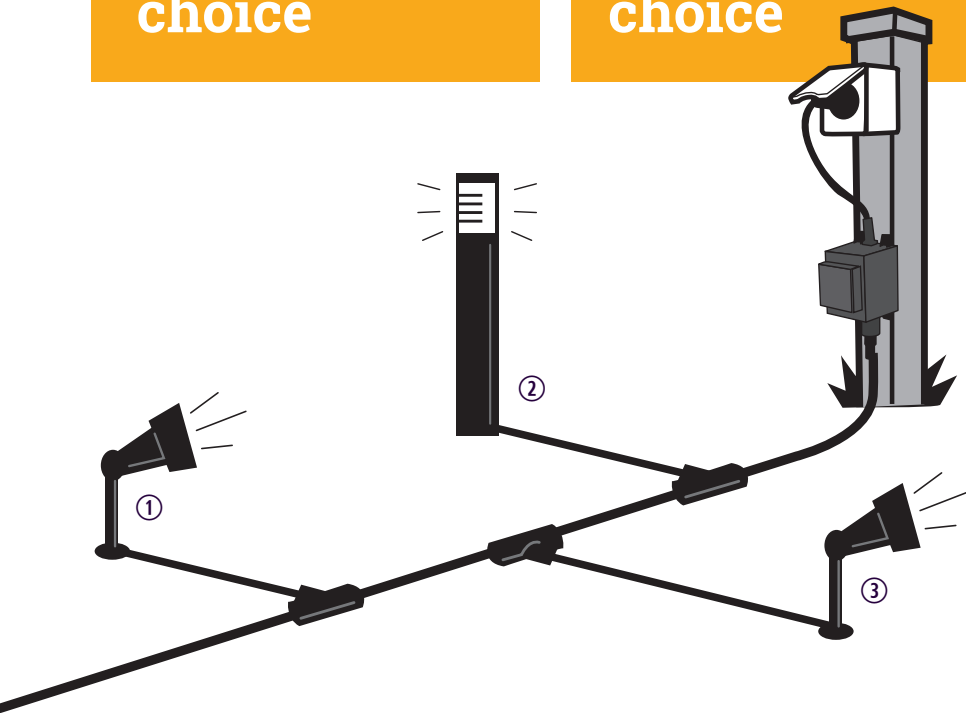

**Transformer choice**

**3**

**Cable choice**

## Example

① Focus	3W
② Arco 40	3W
③ Corvus	5W +

**Total** **11W (11W < 21W)**

The total wattage of the lighting you choose determines the wattage of the transformer. Add up the number of watts of the lamps + accessories for the total wattage. You can then choose a 21, 60 or 150 watt transformer. Tip! Always provide some extra space if you want to add a lamp and / or accessories later.
